ABOUT ME

I am a motivated and passionate junior PHP developer currently pursuing a Diploma in Software Engineering from Aptech. I have hands-on experience in web development using HTML, CSS, PHP, and MySQL. I enjoy building dynamic and user-friendly web applications and continuously improving my coding skills through practical projects. I am eager to start my career as a PHP developer where I can contribute my skills, learn from experienced professionals, and grow in the field of web development.

EDUCATION AND TRAINING

07/12/2024 – CURRENT
ADSE (ADVANCE DIPLOMA IN SOFTWARE ENGINEERING) Aptech Learning Center

Website <https://aptech-education.com.pk/> | **Field of study** Software and applications development and analysis

01/08/2019 – 07/08/2022 karachi, Pakistan
O LEVEL Beaconhouse School System

WORK EXPERIENCE

WEB DEVELOPER – BIDEK SOLUTIONS PVT LTD – 01/12/2025 – 01/03/2026 – KARACHI, PAKISTAN

As a **Web Developer**, I was responsible for the end-to-end creation and maintenance of functional, user-centric web applications. My core activities involved architecting robust database schemas, writing clean and maintainable server-side logic, and developing responsive interfaces that ensured a seamless experience across all devices. I followed a structured, phased approach to development—from initial requirement analysis and system design to rigorous testing and debugging. By leveraging version control to manage project history and implementing modern security protocols, I ensured that every application I built was not only scalable and high-performing but also secure and ready for professional deployment.

FRONTEND DEVELOPER – CORETECH INNOVATIONS – 11/05/2025 – 12/06/2025 – NAWABSHAH

As a **Front-End Developer**, I was responsible for transforming design concepts into interactive, user-facing web applications. My core activities involved writing clean, semantic HTML, CSS, and JavaScript to build responsive interfaces that functioned seamlessly across all devices and browsers. I focused heavily on optimizing performance for speed, ensuring high-quality UI/UX standards, and integrating APIs to connect the frontend with backend services. By following a structured, phased approach to development and using version control to manage code updates, I ensured that every interface was not only visually polished but also highly accessible and maintainable for future growth.

PROJECTS

01/05/2025 – 11/10/2025
Sound – Audio & Video Management Application

Role: Full-Stack Developer
Technologies: PHP, MySQL, Bootstrap, GitHub

- **Dynamic Media Handling:** Built a web-based application focused on efficient audio file management and metadata storage.
- **CRUD Operations:** Developed a backend system to allow for seamless uploading, editing, and deleting of content with real-time database synchronization.
- **UI/UX Optimization:** Created a clean, intuitive interface for media playback and organization, prioritizing fast load times and user engagement.
- **Version Control:** Managed the full development lifecycle using Git/GitHub, maintaining clean documentation and modular code structure.

Role: Lead Developer

Technologies: PHP, MySQL, Bootstrap, JavaScript, GitHub

- **System Architecture:** Developed a comprehensive recruitment platform featuring a dual-interface system for Administrators and Job Seekers.
- **Admin Dashboard:** Engineered a robust administrative panel to manage job postings, track applicant data, and automate interview scheduling.
- **User Management:** Implemented secure candidate registration, profile management with image upload functionality, and a dynamic job application tracking system.
- **Database Design:** Optimized MySQL relational databases to handle complex queries for job filtering and applicant status updates.
- **Responsive Design:** Leveraged Bootstrap to ensure a mobile-first, professional user interface across all device types.
